Brainstorm & idea prioritization

brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Use this template in your own

10 minutes to prepare 1 hour to collaborate 2-8 people recommended

Learn how to use the facilitation tools Use the Facilitation Superpowers to run a happy and productive session.

Before you collaborate A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

Team gathering Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

Set the goal Think about the problem you'll be focusing on solving in

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

PROBLEM

How might we [your

problem statement]?

To run an smooth and productive session

Stay in topic.

Defer judgment

Go for volume.

Encourage wild ideas.

If possible, be visual.

Listen to others.

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

Quick add-ons

Share the mural Share a view link to the mural with stakeholders to keep

Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

Keep moving forward

Strategy blueprint Define the components of a new idea or strategy. Open the template

Customer experience journey map

Understand customer needs, motivations, and obstacles for an experience. Open the template

Strengths, weaknesses, opportunities & threats Identify strengths, weaknesses, opportunities, and threats (SWOT) to develop a plan.

Open the template

Share template feedback

Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.
